ARGUS SECURITY CONSULTING

AVAILABLE REMOTELY ACROSS INDIA AND THE GULF

Microsoft security projects for your clients, delivered under your name.

Custom KQL detections, alert tuning and Microsoft 365 security reviews for IT providers without a security engineer on the bench.

THE GAP

Your clients run Microsoft 365, and many already pay for Defender or Sentinel. When they ask for a Sentinel rollout, fewer false alarms or a security review, that is weeks of specialist work, not a full-time hire. Subcontract it, and keep the client and the margin.

REVIEW

Microsoft 365 & Entra security

MFA coverage, Conditional Access, privileged roles, legacy authentication and risky mail rules. A findings report for the client and a fix list for your team.

EXPECTED 1–2 WEEKS

DETECT

Detection engineering

Data connectors, custom KQL analytics rules mapped to MITRE ATT&CK, noisy alerts tuned. Rules as ARM templates, a tuning log and an analyst runbook.

EXPECTED 2–3 WEEKS

OPTIMISE

Sentinel health & cost

Connector and rule coverage, log tiers, retention and commitment tiers. A health report with an action list, or a before-and-after cost estimate.

EXPECTED 1–3 WEEKS

HOW IT WORKS

I. Scope
A free 15–30 minute call, then a written scope within 2 days: deliverables, fixed fee, dates.

II. Deliver
Work in scheduled hours, with a weekly status email: done, next, blockers.

III. Hand over
A walk-through call, one round of revisions, then the final files. Access removed the same day.

TERMS OF ENGAGEMENT

Under your name
White-label delivery under NDA. Your client never needs to know I exist.

Your client stays yours
The contract bars me from contacting your clients during the engagement and for 12 months after.

Scheduled, not on call
An agreed delivery date and a reply within one business day. 24×7 monitoring only with a longer-term commitment.

Least privilege
Read-only access through an account you control. Changes agreed in writing first.

Start small
One fixed-fee project, paid in thirds. Rates on request, with room for your margin.

You own the result
Reports, rules and runbooks are handed over to keep, in your branding.

TRY IT ON ONE TENANT

A free exposure snapshot.

Give me read-only access to one customer tenant. In about 30 minutes I check Secure Score, MFA coverage, legacy authentication, admin roles and mail forwarding, and send you a one-page summary.

SAME NDA AS PAID WORK · TWO A WEEK

WHO YOU WORK WITH

Mohammed Waheed Azher

Principal · Microsoft Sentinel, Defender XDR & Entra ID

My background is enterprise security operations: incident investigation, KQL detection engineering, log cost reduction and a hands-on Purview DLP rollout for patient health data. I review every deliverable myself.

Reviews follow Microsoft Secure Score, the CIS Microsoft 365 Foundations Benchmark and MITRE ATT&CK.
